

put chemical into group

input chemical name
atoms count

using bit masks

chemical name = "h"
condition = 0

is_level_1 = is_enough_atoms(atomic count, {s: 0, "O": 4, "Na": 1})
Same for level 2 and 3

Same

Condition < 2
no
yes
groups[condition].write(chemical name)
end

is level 1
yes
Condition 1 = 1
no

is level 2
yes
Condition 1 = 2
no

is level 3
yes
Condition 1 = 4
no

Condition < 2
no
yes

groups[condition].write(chemical name)
end

Condition < 4
no
yes

groups[condition].write(chemical name)
end

groups[condition].write(chemical name)
end
